Forecast for Thursday 25 Jul 2024

Weather: A cloudy start with cloud shrouding summits with widespread mist likely. Some rain and drizzle, persistent across western areas of the Park. Drier and increasingly brighter further east. Mostly dry by the evening with some clear spells developing for much of the Park.

Chance of cloud-free hill tops above 800m: 0 to 20% in morning slowly improving to 50% in afternoon and 70% by evening.

Low Cloud and visibility: Widespread cloud covering summits above 400m, occasionally lower on upslopes during the morning. During the afternoon, cloud lifting and breaking in the east of the Park and elsewhere during the evening. Visibility moderate to poor and very poor in cloud becoming mostly good through the afternoon.

Freezing Level*	2900m	2600m	2400m	2700m	2500m	2400m	2200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
Poor visibility will give challenging conditions for navigation. Noticeably cooler across summits in brisk breeze and damp conditions.

Forecast for Friday 26 Jul 2024
Weather: A much brighter and drier day with cloud bases lifting after dawn. Chance of shower or two, mostly light.

Maximum wind: Westerly 25-30 with gusts 30-35mph in afternoon across summits.

Chance of cloud-free hill tops above 800m: 70% in morning and late evening, otherwise 90% or more.

Low Cloud and visibility: Scattered cloud covering summits over 500-600m in morning lifting quickly but reforming during the late evening. Moderate or poor in cloud, otherwise good becoming excellent.

Temperature: **Valleys:** Plus 14 Celsius rising to Plus 16 Celsius.
At 800m: Plus 8 Celsius rising to Plus 11 Celsius.
Freezing level: Well above summits.
